

BRIAND Corentin

Web developer

Skills

- ✓ HTML / CSS / Javascript
- ✓ NodeJs, Express, MongoDB, Mocha
- ✓ Python (Django)
- ✓ React.js
- ✓ French (Mother tongue)
- ✓ English (fluent)

Projects

Check out my portfolio on cbriand.fr

IssueTracker (4 months)

Jira-inspired website. I spent about 2 and a half months on the backend, in Node, and about a month and a half on the frontend in React. This project includes user authentication, a Mongo database for the projects, the team management, permissions, etc. I also used this project to get an initiation to Typescript, and developed a battery of unit-tests with Mocha, and end-to-end with Postman for the backend.

Centre Musical Collois (2 months)

Showcase website for a music school, with a blog, built in React. The blog backend is managed with Strapi, and the contact form is routed through a Datafire mail API

My Portfolio (3 weeks)

For my portfolio, I chose to experiment with Eleventy, and server-side rendering, and also with the 3d animation library Three.js. I also chose to deploy a AWS Lambda function to manage the contact form.

Formation

www.udemy.com

The Web Developer Bootcamp, and *The Advanced Web Developer Bootcamp* by Colt Steele
NodeJs Unit testing in depth by Murtez Alrohani

www.freecodecamp.org

Motivation

Changing careers, I have been learning web technologies and frameworks for several months, and I would love to have the opportunity to work in that field.

Other informations

- ✓ Driving License
- ✓ Personal vehicle
- ✓ Willing to work remote and/or relocate.
